Clear Space

Clear space is measured using X, where X equals the height of the highest peak of the logo mark.
A minimum of 1× X must be maintained on all sides of the logo to preserve clarity and balance.

Do Maintain the defined clear space around the logo at all times to ensure visibility and brand integrity.

Don't Place text, imagery, or graphic elements within the clear space, or allow the logo to feel crowded or constrained.

Measurement Guidance

The clear space is determined by the height of the logo mark. This spacing must be preserved on all sides.

Dear Name,

Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged. It was popularised in the 1960s with the release of Letraset sheets containing Lorem Ipsum passages, and more recently with desktop publishing
